

CST0006 – Computer Programming Foundations

INTRODUCTION to WEEK11

In this lecture and lab section we are going to install and apply some of the different frameworks we learned about in the lecture this week. We will continue with Python as the language and Thonny as the IDE. You will be working from the answer sheet for this lab.

Save all of your .py files within your “2018W_CST0006_LAB11” folder.
